

Spread Bet Roulette (Side Bet)

The rules for Spread Bet Roulette at this casino (as set out below) are our commitment to players in ensuring that the gambling we offer is 'Fair and Open'. Any complaints or disputes should be brought to the immediate attention of Venue Management for resolution.

SPREAD BET WAGER

- The Player places their bet in any one or more of the seven Spread Bet betting areas
- Two concentric roulette number rings appear on the winning number display, these spin in opposing directions.
- The outside wheel represents the traditional wheel on the table, the inner wheel is the virtual wheel.
- At 'No More Bets', both rings stop dead, putting their numbers into a random alignment.
- The game continues until the ball drops, at which point the winning number, indexed by the outer ring (on the display), is added to the aligning number on the inner ring.
- The sum of these two numbers is the game's Spread-Bet result. Please refer to the relevant payable below.
- Any game with a total that includes 00 on either wheel, with result in a push.
- The winning combination total is instantly shown on the winning number display
- Any bets covering the range in which the Spread-Bet number falls are paid out at the specified odds. As indicated on the winning number display.

HOUSE EDGE

The House Edge is a measure of how much mathematically the House expects to win, expressed as a percentage of the player's wager. For example, in a wager with a House Edge of 5% the player will lose, on average over the duration of time, £5 for every £100 wagered.

House Edges vary by casino and game. In some games, player betting or skills decisions can affect the edge, but it's important to keep in mind that the House always has some advantage against the typical player.
